

THE MASTERCRAFT TIRES DIFFERENCE

CAR, SUV AND 4WD TYRES

All Mastercraft tyres are made to meet America's stringent quality standards. With over 100 years experience in making high mileage tyres, Mastercraft tyres come with a lifetime replacement warranty as well as a written mileage warranty ranging from 45,000 - 60,000*kms.

TREAD, CARCASS, COMPOUND

T TREAD DESIGN

Mastercraft Tyres has a range of tread designs to match every driver's needs. On top of this, Mastercraft Tyres have deeper treads and higher treadwear ratings for durability and longevity. That's the reason, they are backed up with a mileage warranty.

Treadwear ratings displayed on the sidewall for longevity and reliability

Manufactured in America with outstanding durability and guaranteed to last up to 60,000kms. This mileage warranty is only possible because most Mastercraft tyres have extremely high treadwear ratings (a benchmark set by the National Highway Traffic Safety Administration Authority in the USA called the Uniform Tyre Quality Grade). The treadwear rating system was designed by the US Government to give consumers a reliable way to compare tyre quality – the rating is displayed on the sidewall of more than 90% of tyres sold in Australia – alongside a traction rating that is also independently verified. Use this rating to understand why Mastercraft tyres last so much longer than competing products and represent great value for money.

C CARCASS CONSTRUCTION

The reason why Mastercraft Tyres have deeper treads is because it has a strong carcass construction with wider and stronger steel belts under the tread to allow Mastercraft Tyres to increase the width of the tread surface and produce deeper treads.

C COMPOUND FORMULA

Mastercraft Tyres use chemically bonded silica rubber compounds derived from ultra-high performance tyre technology, giving enhanced all-weather grip and longer life.

MILEAGE AND LIFETIME REPLACEMENT WARRANTY

Backed up with a Mileage Warranty and a Lifetime Replacement Warranty

Mastercraft tyres come with a written mileage warranty ranging from 50,000 to 60,000 kilometres. We guarantee that you will get a certain amount of kilometres out of every Mastercraft tyre you buy. Mastercraft Tyres also comes with an Australia-wide lifetime replacement warranty against manufacturing faults for the life of the tyre. See page 29 to learn more.

LSR GRAND TOURING

GUARANTEED TO LAST 60,000KMS*

The LSR Grand Touring represents the latest in luxury, all-season touring performance for a wide range of passenger vehicles. The LSR Grand Touring is built around innovative design and technology that delivers a well-blended and balance of all-season performance and long tread life.

- **Excellent Hydroplane Resistance**
Four, wide circumferential grooves designed to evacuate water out of the tread contact area, provide excellent hydroplane resistance.
- **Even Wear**
The chamfered edges applied to the tread elements help to promote even wear.
- **Improved Handling and Control**
SCS™ (Stability Control Sipes) is an innovative technology that allows the tread elements of the tyre to interlock which provides more surface area contact with the road. This improves tyre handling to give you more confidence and better control.
- **Excellent Wet Traction**
The high-content silica tread compound improves traction in wet conditions, reduces heat generated by the tyre and lowers rolling resistance for better fuel mileage.

COURSER AXT

GUARANTEED TO LAST UP TO 60,000KMS*

The Courser AXT is a true all-terrain tyre with great off-road capabilities and all-weather performance. This tyre features a SUV carcass construction, the perfect alternative that sits between a P-Metric and a light truck tyre.

- **Aggressive Off-Road Performance**
Designed to tackle tough conditions, alternating shoulder scallops provide superior handling and traction to increase off-road traction of the tyre.
- **Enhanced Stone Drilling Protection**
Stone ejector ribs and ramped tread edges help reduce stone retention by dislodging rocks and releasing stones to prevent tyre damage.
- **Increased Traction**
Wider, zig-zag shaped circumferential grooves provide traction and grip in softer surfaces like sand and dirt.

AVENGER G/T

The Avenger G/T is a cosmetic radial tyre available in a subtle black sidewall or an eye-catching raised white letter sidewall that retains the character of the old 'muscle car'.

- **Designed for Muscle Cars**
With a smooth sidewall and unique block raised white letters this tyre fits perfectly with the look of traditional muscle cars.
- **Resists Uneven Wear for Longer Life**
A notched solid centre rib along with slotted tread blocks resists uneven wear.
- **All-Season Traction**
The four wide circumferential grooves allow increased water evacuation and superior wet traction.

A/S IV

This A/S IV fits a variety of older vehicles and is available in select white sidewall sizes, perfect for making a statement in your classic car.

- **White Strip Sidewall**
A smooth white strip on the sidewall creates a style in tune with classic vehicles.
- **Excellent Wet Grip**
Wide circumferential grooves along with lateral grooves allow for improved wet grip.
- **Excellent Air Retention**
Using a halobutyl inner liner provides excellent air retention for low mileage use.
